Contents of volume 46

Volume 46, Nr. 1, AUGUST 2001

Papers

1 *K.-L. Hsieh and L.-I. Tong*
Optimization of multiple quality responses involving qualitative and quantitative characteristics in IC manufacturing using neural networks

13 *S. Balasubramanian, R.W. Brennan and D.H. Norrie*
An architecture for metamorphic control of holonic manufacturing systems

33 *C.A. Costa, J.A. Harding and R.I.M. Young*
The application of UML and an open distributed process framework to information system design

49 *D. Kosmopoulos and T. Varvarigou*
Automated inspection of gaps on the automobile production line through stereo vision and specular reflection

65 *Y.B. Bai and X.W. Xu*
Object Boundary Encoding — a new vectorisation algorithm for engineering drawings

75 *D. Tang, L. Zheng, Z. Li and K.-S. Chin*
STEP-based product modeling for concurrent stamped part and die development

95 *L.-P. Khoo and L.-Y. Zhai*
A prototype genetic algorithm-enhanced rough set-based rule induction system

Volume 46, Nr. 2, SEPTEMBER 2001

Papers

107 *N. Navet and Y.-Q. Song*
Validation of in-vehicle real-time applications

123 *S. Lee, K.C. Lee, M.C. Han and J.S. Yoon*
On-line fuzzy performance management of Profibus networks

139 *J.-H. Yan and C. Wu*
Scheduling approach for concurrent product development processes

149 *H. Hubel and G.J. Colquhoun*
A reference architecture for Engineering Data Control (EDC) in capital plant manufacture

167 *Y.-L. Hsu and M.-S. Hsu*
Weight reduction of aluminum disc wheels under fatigue constraints using a sequential neural network approximation method

181 *T.Y. Wang, K.B. Wu and Y.W. Liu*
A simulated annealing algorithm for facility layout problems under variable demand in Cellular Manufacturing Systems

189 *J. Sun and D. Xue*
A dynamic reactive scheduling mechanism for responding to changes of production orders and manufacturing resources
209 *D. Xue, J. Sun and D.H. Norrie*
An intelligent optimal production scheduling approach using constraint-based search and agent-based collaboration

Volume 46, Nr. 3, OCTOBER 2001

SPECIAL ISSUE: Holonic Manufacturing Systems

233 **Editorial**

Papers
235 *R.W. Brennan and D.H. Norrie*
Evaluating the performance of reactive control architectures for manufacturing production control
247 *J.-P. Kruth, T. Van Ginderachter, P.I. Tanaya and P. Valckenaers*
The use of finite state machines for task-based machine tool control
259 *F. Lin and D.H. Norrie*
Schema-based conversation modeling for agent-oriented manufacturing systems
275 *M.H. Larsen, C. Sørensen and G. Langer*
Development of a Production Meta Product State Model
289 *T. Arai, Y. Aiyama, M. Sugi and J. Ota*
Holonic assembly system with Plug and Produce
301 *M.M.T. Giebels, H.J.J. Kals and W.H.M. Zijm*
Building holarchies for concurrent manufacturing planning and control in EtoPlan
315 *T. Heikkilä, M. Kollingbaum, P. Valckenaers and G.-J. Bluemink*
An agent architecture for manufacturing control: manAge
